

Chemicals

Pesticides, fertilisers and fuels can be dangerous to the people using them and to children or others who accidentally come into contact with them.

The DANGERS of everyday living on the FARM

Whether you are living on a farm or just visiting, be aware of potential hazards, and protect yourself and others so that you have a safe and enjoyable time.

Tractors

Every four days, an Australian is killed in a tractor accident.

Child Safety

Fifty per cent of all childhood deaths on farms are due to drowning and most of the children are under five.

Noise

Long-term exposure to noise damages the hearing nerves of the ear and causes a gradual permanent loss of hearing.

Diseases

Many diseases are transmitted from animals to humans.

Animals

Animals are an attraction on farms, but they are also responsible for up to one third of farm injuries.

No job is more important.
Workplace Safe
An initiative of WorkCover Tasmania and Workplace Standards Tasmania
